dispense-eez* capillary tubes

—easy-to-use dispenser unit with folding base and unique, slide-action vials.

—now in 200-tube vials.

Capillary tubes are nested in a sliding container, seated in the dispenser-vial.

Vial is inserted into base which forces tubes upward causing them to fan-out for easy access.

The assembled dispense-eez unit then fits easily into collection trays and carts . . . also serves as a handy work-station unit.

Bulk replacement packs available for use with dispenser unit.

- **SELECT HEPARINIZED CAPILLARY TUBES (Red End)** Heparinized Capillary Tubes, (Red End), 75mm. ± 2mm. long, inside diameter 1.1—1.2mm., wall thickness 0.2 ± 0.02mm., minimum taper not in excess of 0.0254mm. in 76.2mm.
- **CAL-MARK® HEPARINIZED, CALIBRATED CAPILLARY TUBES (Red End)** Calibrated, Heparinized Capillary Tubes, black band, 75mm. ± 2mm. long, inside diameter 0.55mm. ± 0.05, outer dimension 1.40—1.75mm., calibrated 60mm. from end. For use on direct reading centrifuges.
- **SELECT NON-HEPARINIZED CAPILLARY TUBES (Blue End)** Same specifications as Select Heparinized except Blue End and without Heparin.
